Inhaltsverzeichnis des Bandes 255

Seite

Bartenwerfer, Wolfgang, Ein nichtarchimedisches Analogon zum Kugelsatz für analytische Mengen 44

Becker, Jochen, Löwnersche Differentialgleichung und quasikonform fortsetzbare schlichte Funktionen 23

Burgess, D. A., A note on character sums over finite fields 80

Edwards, J. R. and **Wayment, S. G.,** A summability integral 85

Frank, Günter, Zur Zerlegung linearer Differentialoperatoren mit ganzen Koeffizienten 94

Friedlander, John, On the number of ideals free from large prime divisors . . 1

Hooley, Christopher, On the Brun-Titchmarsh theorem 60

Iversen, Birger, On the existence of abelian varieties with good reduction . . 155

Kelleher, James J. and **Taylor, B. A.,** Closed ideals in locally convex algebras of analytic functions 190

Kleiman, H., Normal integral bases and the Galois groups of Galois extensions of number fields 83

Lang, Serge and **Trotter, Hale,** Continued fractions for some algebraic numbers 112

Lidl, Rudolf and **Ch. Wells,** Chebyshev polynomials in several variables . . . 104

Muhly, Paul S., A structure theory for isometric representations of a class of semigroups 135

Ratliff Jr., L. J., On prime divisors of the integral closure of a principal ideal . 210

Schmidt, Jürgen, Universal and internal properties of some completions of k-join-semilattices and k-join-distributive partially ordered sets 8

Spira, Robert, The lowest zero of sections of the zeta function 170

Taylor, B. A., siehe Kelleher, James J.

Trotter, Hale, siehe Lang, Serge

Valdivia, Manuel, Some criteria for weak compactness 165

Wang, Ya-Yen Lee, On the solution of the variational problem of the arc length in 4-dimensional affine space 99

Wayment, S. G., siehe Edwards, J. R.

Wells, Ch., siehe Lidl, Rudolf
